DRAGON ON EARTH

A star making its way to Earth

By Santiago.....

The astronomers
using their
telescope saw
an immense
star shooting
down to Earth
faster than
any bullet.

In the beginning,
the star was
getting bigger
because it was
getting nearer
to Earth. Suddenly,
it stopped!

Everybody had
got surprised
of the black speck

That the
astronomers
had found
in the middle
of the star.

On the third
night you
could see the
speck without
a telescope!
And on the
fifth night
you could
see it a dreadful
silhouette.

In a few more
days it landed
on Earth!

IT WAS A
TERRIFIC
DRAGON!

That wanted
to eat living
things, so
everybody
had got very
scared!

Jeff a 45
year old
veterinarian
from Australia
who saw
everything
told us:
"It was terrifying!
A massive
earthquake
had knocked
down all the
buildings!"

We need to
fight!
