

Animals including Humans

What are we learning?			
To describe changes as humans develop.	To explore key milestones in baby and child development.	To describe the changes as humans develop to old age.	To understand the lifespan and gestation periods of mammals.

Key vocabulary		
foetus	an unborn baby growing inside the mother's womb.	
baby	from birth to around 1 year old.	
child	a young human below the age of puberty	
adolescent	the stage between early childhood and adulthood from around age 11 to 17.	
adult	from around age 18 onwards.	

Key vocabulary		
elderly adult	a person who is over the age of 65.	
gestation	the period of time that a foetus develops in its mother's womb.	
mammal	an animal with a spine and with fur or hair on its body, which gives birth to live young and feeds its young on milk.	

Human **life cycles** have six main stages.
