

# UNITY

Week one

# What Unity means

- Dictionary definition- the state of being joined or united as a whole.
- Working together as a team to achieve missions/goals/victory.
- Unity means you can not do it by yourself, you need others to help you achieve your goal.

- These are some scenarios in which you need to show unity:

You are playing a football match, there is 1 minute left and you are drawing 1-1. You need to work as a team to get the winning goal.

Your team is one player short, you need to work extra hard together to replace the missing player.

See how all these basketball players are holding hands?

They are a team, they stick together and stride forwards.
